

My Game Development Passion Projects

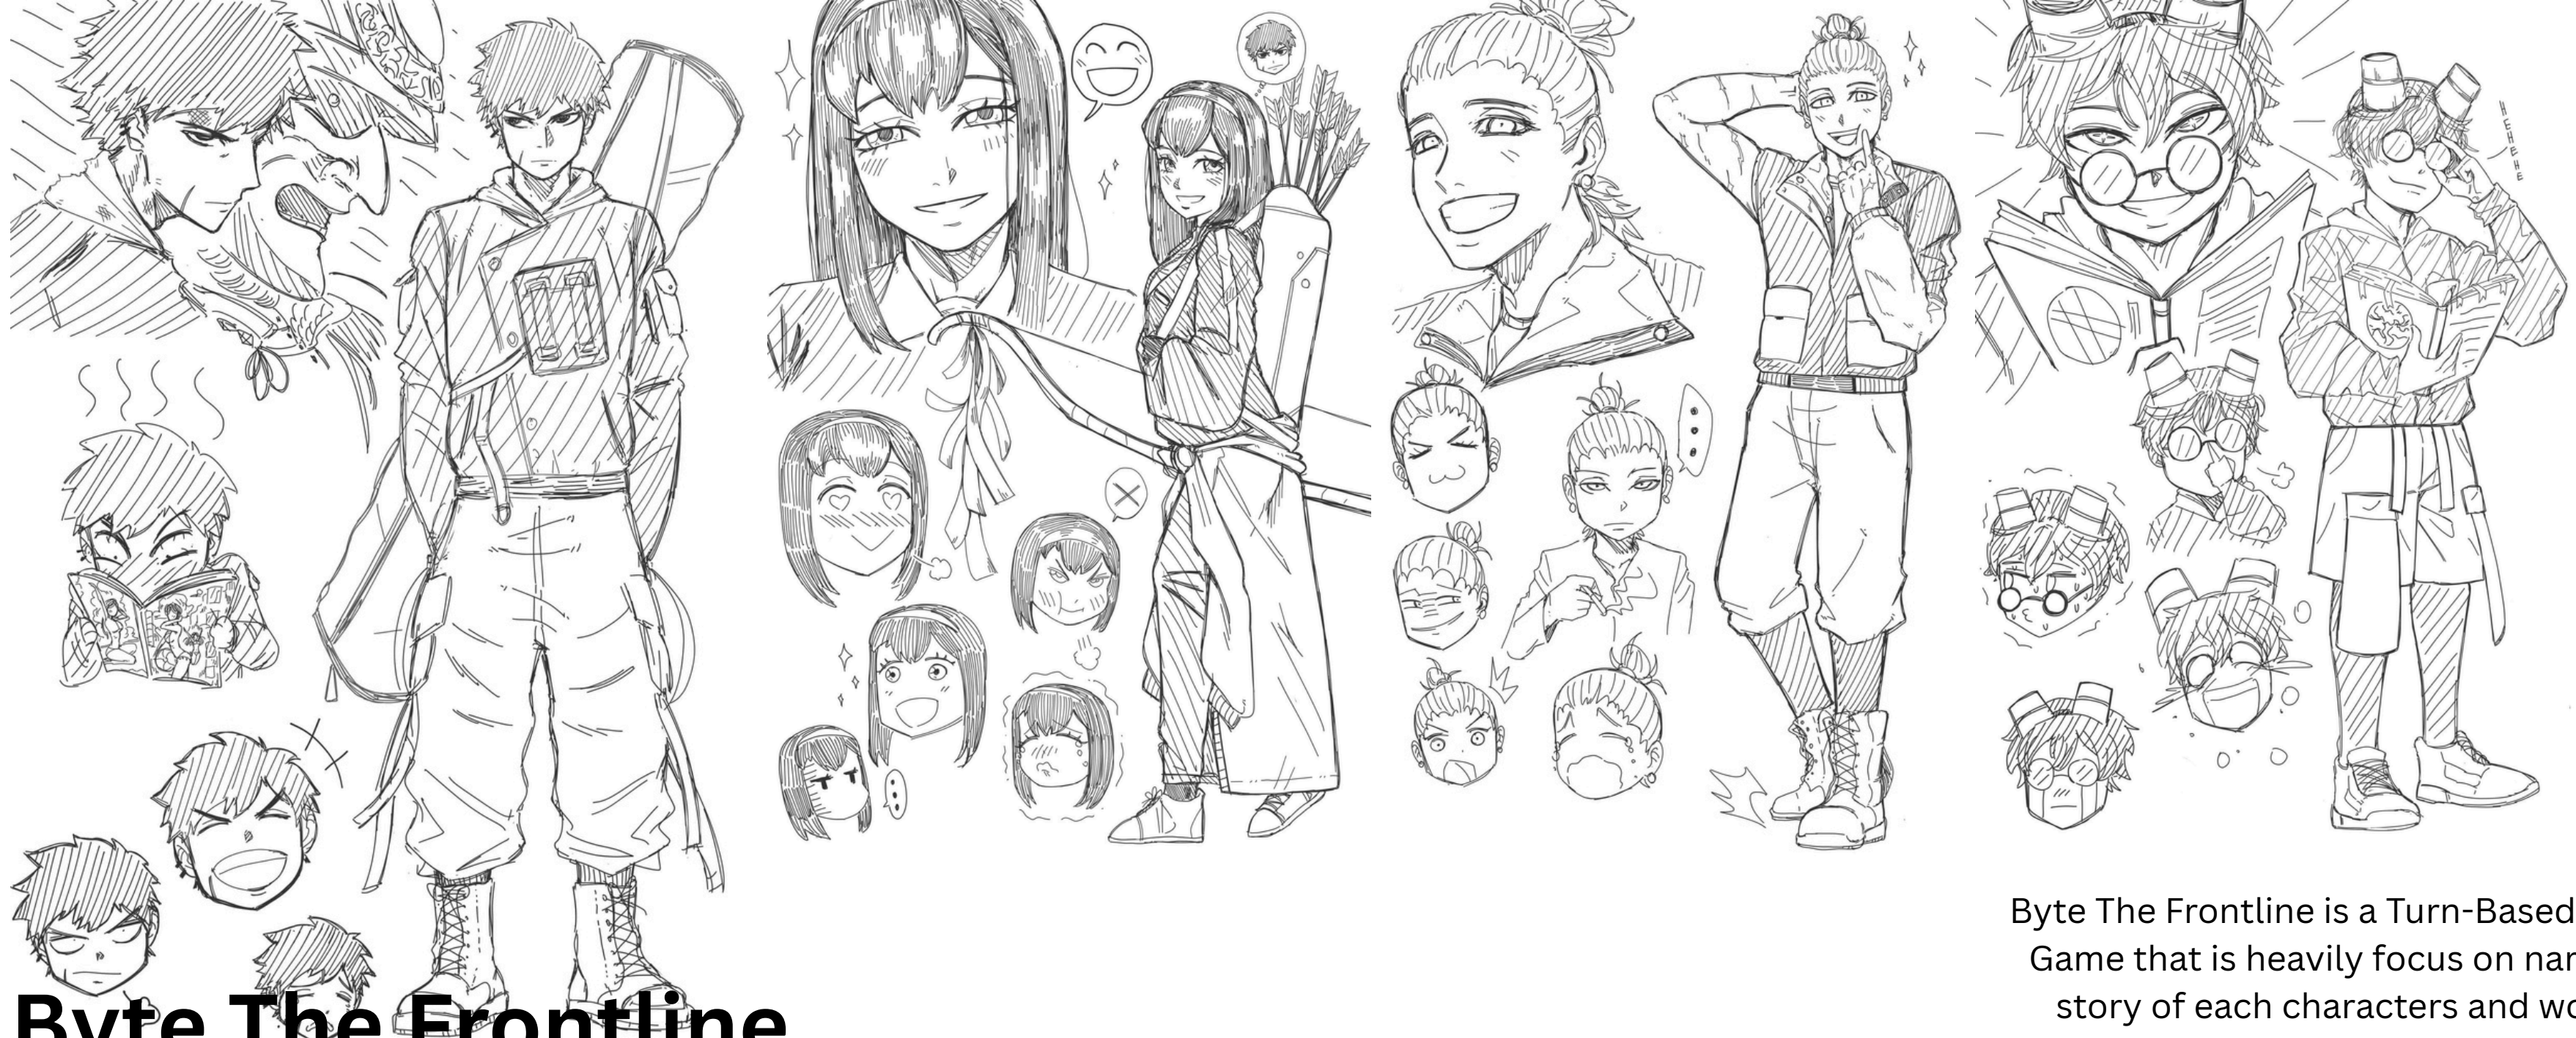

Project Lenses is a psychological horror 2D game I am currently writing as a passion project of mine under the indie studio name Witchcraft Interactive.

Art by Endorcer
(Witchcraft Interactive 2D Artist)

Project Lenses is psychological horror game based on a journalism student of CVSU Indang named Lilly, who wants to win the Headline of the Year award by making an article about the multiple accidents that happened on their campus but as she tries to uncover the truth, a bunch of staff stopped her from entering a certain building, that's when she had an idea of exploring her campus when nobody is around, at night. Play as Lilly and help her uncover the ugly truth behind the multiple bloody accidents at her campus.

this passion project Game is inspired by Silent Hill and The Evil Within

(web-comic artist)

Byte The Frontline

Follow the story of each operators from ABEX 3rd Division Regiment of the Japanese Anti-Byte Alliance. In a Byte-infested world, where our own reality has an alternate reality dimension inside. Bytes, a bunch of alien bugs that lives inside our reality dimension called “Frontline”, each Byte feeds itself by eating the line of codes inside that is connected to our reality. By eating said codes they transform or worse they consumes the power of that code that is connected to an application, website, or hardware in our reality. Play as Kai Muramasa and other companions to maintain and stabilize our reality from shattering and merging with the Frontline.

Byte The Frontline is a Turn-Based Action Game that is heavily focus on narrative story of each characters and world-building.

The game is also set in a not so distant future, 2085

this passion project Game is inspired by Clair Obscur Expedition 33, Neon Genesis Evangelion and 13 Sentinels
